Pondbrook Road	

Note: The planned work listed above is to be funded through the May 2011 Streets Override Article. Additional streets may be added if conditions warrant and actual costs come in lower than the May 2011 estimated costs. Additional roadway infrastructure work will be added to this list through the Chapter 90 program.

The Town does try to coordinate paving work with underground work planned by various utilities. Columbia Gas is actively replacing old gas mains that are failing as a result of corrosion. Verizon is currently adding underground conduits to support FIOS in neighborhoods where their existing cables are underground. We will work with these utilities and adjust our future plans accordingly.
